

SUPPLEMENTARY INFORMATION:

Title: Veterans Affairs Acquisition Regulation (VAAR) Provision 852.211–75, Technical Industry Standards.

OMB Control Number: 2900–0586.

Type of Review: Extension of a currently approved collection.

Abstract: VAAR provision 852.211–75, Technical Industry Standards, requires that items offered for sale to VA under the solicitation conform to certain technical industry standards, such as Underwriters Laboratory (UL) or the National Fire Protection Association, and that the contractor furnish evidence to VA that the items meet that requirement. The evidence is normally in the form of a tag or seal affixed to the item, such as the UL tag on an electrical cord or a tag on a fire-rated door. This requires no additional effort on the part of the contractor, as the items come from the factory with the tags already in place, as part of the manufacturer's standard manufacturing operation. Occasionally, for items not already meeting standards or for items not previously tested, a contractor will have to furnish a certificate from an acceptable laboratory certifying that the items furnished have been tested in accordance with, and conform to, the specified standards. Only firms whose products have not previously been tested to ensure the products meet the industry standards required under the solicitation will be required to submit a separate certificate. The information will be used to ensure that the items being purchased meet minimum safety standards and to protect VA employees, VA beneficiaries, and the public.

SUPPLEMENTARY INFORMATION:

Title: Veterans Affairs Acquisition Regulation (VAAR) Provision 852.211–74, Special Notice (previously 852.210–74).

OMB Control Number: 2900–0588.

Type of Review: Extension of a currently approved collection.

Abstract: VAAR provision 852.211–74, Special Notice, is used only in VA's telephone system acquisition solicitations and requires the contractor, after award of the contract, to submit descriptive literature on the equipment the contractor intends to furnish to show how that equipment meets specification requirements of the solicitation. The information is needed to ensure that equipment proposed by the contractor meets specification requirements. Failure to require the information could result in the

installation of equipment that does not meet contract requirements, with significant loss to the contractor if the contractor subsequently had to remove the equipment and furnish equipment that did meet the specification requirements.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.
